Full Face Mask

English

Please read instructions before use.

WARNING: If the user or patient that any serious incident that has occurred in the device should be reported to the manufacturer and the competent authority of the Member State in which the user or patient is established.

(2) This device is intended for providing life support ventilation.

(3) Use your mask as prescribed by your physician.

(4) The value and exhalation port have specific safety functions.

(5) The valve and exhalation port have specific safety functions.

(6) The mask should be comfortable in the mouth and exhalation port in the elbow. The mask should not be worn if the valve is damaged, distorted or torn.

(7) Do not block or seal exhalation ports. Occlusion of the exhalation port is contraindicated to avoid having an adverse effect on the safety and quality of the device.

(8) The mask is intended to provide an interface for Continuous Positive Airway Pressure (CPAP) or bi-level therapy. The mask is intended for single-patient reuse in the home and multi-patient, multi-use in the hospital.

The mask is to be used on patients greater than 30 kg for whom positive airway pressure (CPAP or bi-level system) has been prescribed.

(9) No natural rubber latex is present in the mask, so a separate

exhalation port is not required. US Federal law restricts this device to sale or by on the order of a physician.

(10) At a fixed rate of supplemental oxygen flow, the inhaled oxygen concentration varies depending on the inspire setting and the patient's mask. Most types of CPAP and leak rate. This warning applies to most types of CPAP or bi-level devices.

(11) At a fixed rate of pressure, some exhaled gas may remain in the mask, and be re-breathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(12) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(13) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(14) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(15) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(16) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(17) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(18) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(19) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(20) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(21) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(22) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(23) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(24) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(25) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(26) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(27) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(28) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(29) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(30) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(31) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(32) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(33) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(34) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(35) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(36) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(37) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(38) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(39) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(40) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(41) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(42) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(43) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(44) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(45) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(46) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(47) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(48) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(49) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(50) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(51) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(52) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(53) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(54) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(55) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(56) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(57) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(58) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(59) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(60) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(61) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(62) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure that the device is activated, and after turning on turn on the oxygen supply.

• STOP THERAPY: Turn off the oxygen supply, then turn off the device. This ensures that oxygen does not accumulate within the device and creates the risk of fire.

(63) Do not use this mask unless the CPAP or bi-level device is turned on.

Explanation of the Warning: CPAP and bi-level devices are intended to be used with special masks (or cushion) which have a valve and exhalation port to prevent air from being exhaled and the exhaled air may be rebreathed. Rebreathing of exhaled air for longer than several minutes can lead to some circumstances lead to saturation.

(64) Some users may have skin redness, irritation, discomfort, or other adverse reactions. If this happens, discontinue to use, and contact your health care professional.

(65) Do not use this product if it does not fit. It should be used only with the device or flow generator equipment (CPAP or bi-level system) to ensure optimum therapy.

(66) When using the device with an oxygen supply, check the following.

• START THERAPY: Ensure

ILer as instruções antes de utilizar.**AVISO**

O utilizador ou paciente a quem temo ocorrido um incidente grave e potencialmente letal. Usar sempre as especificações que não estejam de acordo com o dispositivo ou fabricante e autoridade competente do Estado-membro onde o utilizador ou paciente esteja.

O dispositivo não é adequado para proporcionar ventilação de suporte de vida.

Uso da máscara conforme prescrito pelo médico.

A válvula e a porta de exalação têm funções de segurança.

•A válvula é uma peça plana que funciona com a porta de exalação no contolvo. A máscara não deve ser usada se a válvula estiver danificada ou se não estiver utilizada em ambiente controlado.

•O dispositivo é: +5°C a +35°C / +41°F a +95°F; 15% a 95% RH.

1. INSTRUÇÕES DE UTILIZAÇÃO

Este manual deve ser usado para a configuração inicial do sistema e guarda para fins de referência.

1.1. Fim de vida útil

A máscara tem como objetivo proporcionar um interface para a pressão positiva continua (CPAP) ou terapêutica binivel. A máscara é feita para ser utilizada com máscaras de oxigénio e dispositivos utilizados em ambiente controlado.

A máscara deve ser utilizada em pacientes com mais de 30 kg a quem foi prescrita a pressão positiva contínua (CPAP) ou sistema binivel.

NOTA: A máscara só é uma parte de uma expiração segura. Alegação dos EUA restringe a venda desse dispositivo apenas por um médico ou sócio.

1.2. Contraindicações

Esta máscara não é para uso em pacientes com as seguintes condições:

•Crigura recente ou criguras ou outras saídas, hemia, hérnia, refluxo excessivo, tórax, pressão sanguínea patologicamente baixa, desidratação, fuga do fluido cefalorraquídico e crigura craniana recente ou trauma. Esta máscara não deve ser utilizada se o paciente estiver a usar medicamentos que induz vômitos, ou se não estiver cooperantes, inconscientes ou não conseguem remover a máscara sozinhos.

Não deve ser colocada em áreas de risco de úlcera de úlceras devido ao expirado por vários minutos pode, em algumas circunstâncias, levar a asfixia.

•Algumas utilizadas podem sofrer reacção adversa na pele, infecção, coagulação ou descoagulação, ou alterações de sangue devido à utilização, é contacto o profissional de saúde.

Não utilizar este produto para além da sua finalidade. Deve ser usado para aterrar a máscara e dispositivo de gerador de geração de fluxo (CPAP ou sistema binivel) para assegurar uma terapêutica óptima.

•Quando é usado com um abastecimento de oxigénio, verifique se o paciente.

•**INICIAR A TERAPÉUTICA:** Certifique-se que o dispositivo está ativo, e que o ar está a fluir antes de ligar o dispositivo.

•A máscara deve ser utilizada com máscaras especiais (S & M e L) e deve ser utilizada com tubos de respieração contínua.

•O dispositivo CPAP pode permitir uma menor taxa de fluxo de oxigénio e depois o dispositivo. Isto assegura que o oxigénio não é necessário para a expiração.

•A máscara deve ser utilizada em pacientes que não sejam cooperantes ou estejam a tomar medicamentos que possam causar vómitos.

•A utilização de uma máscara pode causar dores nos dentes, náuseas ou vômitos ou agudizar uma condição dental existente. Se ocorrer algum sintoma, consulte o seu médico ou dentista.

•(N)ão aperte demasiado as correias do protetor de cabeça.

•(O) uso de um dispositivo que não foi concebido para ser montado com a máscara pode diminuir a segurança ou alterar o desempenho da máscara.

•(A)juste da máscara para o rosto de forma confortável. A almoftada deve tocar ligeiramente o rosto.

2. DESCRIÇÃO DO PRODUTO

2.1. Contenutos

•Máscara com correia do protetor de cabeça •Manual do utilizador

Desembale para examinar o conteúdo par ver se existem danos, que possam ter ocorrido durante o envio. Contacte o revendedor de imediato se existirem danos.

2.2. Vista geral da máscara

•Correia do protetor de cabeça •Almoftada da máscara(disponível S & M e L) •Protetor de cabeça •Tubo flexível •Cabo de alimentação •Correia de apoio para o rosto da máscara. Ocorre dispositivos estão ligados e a funcionar adequadamente, a fresco do dispositivo empurra o ar expirado para fora através dos canais de ventilação na máscara. Contudo, se o dispositivo estiver ligado e a funcionar adequadamente, a máscara não será suficiente, e o ar expirado pode ser nomeadamente inspirado. Aspirar o dispositivo é ar expirado por vários minutos pode, em algumas circunstâncias, levar a asfixia.

•Lembrar: Lavar a cara. Não usar hidratante ou loção nas mãos ou rosto.

•Par coloca:

•Retirar os engates do protetor de cabeça nas correias inferiores.

•Colocar a máscara e substituir o lado de silicone da almofada.

•Inspeccione a máscara e substituir o lado de silicone da almofada ou correias do protetor de cabeça para evitar fuga de ar e desconforto.
